

Indian Valley Travel offers a “deliberately different” approach to travel - a chance for travelers and adventurers of every level of ability and interests to experience fantastic journeys around the globe, both on the land and below the water.

Our mission is to constantly seek out new and exciting destinations to visit and build trips that combine adventure and value for the discerning traveler. In keeping with our “deliberately different” philosophy, one of the key elements that separates Indian Valley Travel from the pack is how many of our trips venture from the beaten path. Our sustainable travel, for instance, provides an opportunity to give back to the communities we visit through ‘voluntourism’ and community service programs that we incorporate into the trip itinerary. Accessibility is reviewed on our journeys also, and most trips have an accessibility rating to allow travelers with mobility challenges to select adventures that best suit them.

This multi-faceted focus of our programs, the variety of exciting destinations, and the value we package into our adventures, offer parallel paths towards the attainment of your travel goals while supporting our mission statement, assuring every participant a chance to play a key role in making a contribution to the world we share.
